Access to LON-CAPA

Start up a web browser such as Mozilla’s Firefox. Be sure it is set to accept “cookies” and to run “javascript”. The browsers in the TCC computer lab should be set up this way already.

Type in the address http://loncapa.tcc.fl.edu and you should get this page:

Enter your Username:

Your Username is the same as your TCC username, the user ID you use to access Eaglenet and TCC e-mail. Hit the “Tab” key to go to the next field.

Enter your Password:

Your Password has been set to be the same as your username when your account was first created. Type your password and hit the “Enter” key, or click on “Log in”

Your username only works in the Domain “tccfl”.

Read http://loncapa.tcc.fl.edu/adm/loginproblems.html if you have trouble accessing the system.

Once you have logged in, a Remote Control will pop up. If you have a pop-up filter running on your browser, you will want to disable the filter for this site. (Firefox will automatically prompt you to do this.) The controls will appear on a header in the main window if the Remote Control is disabled.

1. Click on “PREF” to bring up the User Preferences page. (Watch the display on the Remote Control while you do this. It tells you what will happen.)

   Click on “Change Password” and follow the directions to change your password to something unique and easy to remember. **Do this now!**

2. Click on “COURSES” to bring up a list of courses you are enrolled in.

3. Click “SELECT” to choose this one. (If you are only taking one class that uses LON-CAPA, you will go directly to that course when you click on “COURSES”.)

Take a look at your assignments. Click on “EXIT” to logout.

When you see a little blue box 🔍, you can click on it to get a help screen about that item.
